

The advantages of distance education

33 major universities in the USA teach everyone on the programme of distance education in Turkey, about half of the students never see their teachers live, in the UK students have long been studying some subjects from the comfort of home...

Online learning or e-learning has already proven its effectiveness, millions of people around the world appreciated the advantages of modern method of obtaining new knowledge. It is not surprising that the Institute of distance education is becoming increasingly common in our country. The secret of its great popularity? Let's deal.

Today we think that distance education came into our lives with digital technologies. In fact, looking for the perfect source of information mankind had a long way to go. In fact, researchers are still arguing about when and where originated distance learning. Someone even said the founder of the idea of remote education of the Apostle Paul who had the idea to send to the temples of their Scriptures. Let the origins of distance education are being lost in the dark ages, for us one thing is clear – the need for rapid and effective learning has always been important. On the way to this dream, people used all the achievements of civilization. With each stage of technology development, its popularity grew like a snowball. In the XVIII-XIX century, when it formed a regular system of postal transportation, began to develop a "correspondence" education. Pupils received in the mail the lecture, in response to the sent questions and written assignments for review.

In the universities of Europe, Canada, Australia and the United States in the late nineteenth century of the Department of distance education began to open one after the other. The advent of television and radio has made adjustments to the methods of distance learning, increasing the audience of students in hundreds of times. It seems that the training programs were released not long ago – many of them certainly remember. However, the broadcast was a significant drawback – students cannot receive feedback. In the age of computer technology, this disadvantage has been eliminated. The world wide web has combined a huge amount of information, and with Web technologies, learning is possible from any computer having access to the network.

Learning in the fun

Remember your school and College years. The early morning could barely get out from under the warm blankets, washed in a hurry, stuffed in the sandwich. Regardless of the weather, had to go outside and trudge to school. The rest of the day passed in slumber with open eyes, interrupted by light moments in the form of changes and lunch. And then again – the long return home, accompanied by tubes at 9 points. Now imagine a different scenario. Arise awake and alert.

Slowly eat Breakfast, pour a Cup of coffee, settle comfortably in the chair, open my laptop and begin to learn. Listening to lectures, watching video tutorials, doing homework. When you need to clarify something, contact the teacher via email or Skype. And all that you do, do not remove the legs from the cozy fur Slippers. Described morning idyll is just one of the training options. Can absorb new knowledge on the way to work, at the cottage lying in a hammock in Thailand... most Importantly, learning happens at a convenient time without departing from the core business. Pleasant memories of school and College life, mostly nostalgia at parties, hikes and get-togethers. The process of obtaining knowledge has been a great unit! Distance education proves that learning can indeed be fun.

Are on the right [wrote my research paper](#) course

Dedicating a third of our life education, many are beginning to realize that you studied the wrong and not them. Often, the only thing left to commemorate the end of the prestigious University – a treasured crust, and in my head – a pitiful scraps of knowledge. It is not necessary to regret the missed opportunities for self-realization modern technologies give unlimited space. In order to acquire new knowledge or to change a field of activity sometimes it is enough to pass distance learning courses. Besides, the low cost makes this type of training is quite affordable. Today there is a large selection of remote educational programs. Some of them give knowledge on a particular subject, helping you to learn a new profession – landscape designer, accountant, photographer...Has a distance learning program where you will learn to think systematically and creatively, giving impetus for further self-development. By the way, many employers recognize that candidates who undergo this training have a significant competitive advantage. Choose courses that you like. By learning remotely, you can choose your own not only our subject, but even of the teacher. No imposed subjects, only the information that you will really benefit.

The road to knowledge

There are still people who doubt the effectiveness of distance learning. Usually this prejudice is due to the seeming lack of control on the part of teachers. Full responsibility for the learning lies with the student only in the study of free courses, although even in this case, as a rule, it is proposed to carry out certain tests and assignments. But, if you want to go to school remotely, and are willing to pay for a certain amount of money, tune in a comfortable, but still present serious training. Teachers are good courses will not leave you to flounder in a sea of new information, education in distance format does not imply the necessity of independently obtaining new knowledge. Your supervisor (aka tutor) is happy to give individual advice and answer all the questions in the on-line mode. As with face-to-face training, a mentor will organize your work, monitor it and guide the learning process in the right direction. The place of student gatherings from Smoking-rooms and dormitories are moved to special chats and forums. You can always discuss pressing issues, and just to gossip. What you will not be in the form of distance learning, so it's a tough schedule and the need to respond serrated lesson at the blackboard. Although, you are unlikely to miss them...it is Possible that online learning will bring us more surprises. While we consider this model as an additional, but perhaps in the future things will change and distance education – courses, trainings, seminars, workshops, webinars and conferences practically will not leave traditional occupations likely.

In the age of modern technology anyone can do what he needs and interesting. The person who wants to achieve something – looking for ways,

who does not want to – imagine reasons. Between you and your dream is just a step. You have a computer and Internet? Then the path to great discoveries don't need anything else!
